Protection							
Protection against known and zero-day malware	●	●	○	○		○	●
Protection against known and zero-day ransomware	●	●	○	○		○	●
Protection against known and zero-day exploits	●	●	○	○		○	●
Anti-spyware, anti-phishing protection, etc.	●	●	●	●		●	●
Protection for multiple attack vectors (Web, email, network, devices)	●	○	●	●		●	●
Traditional protection with generic and optimized signatures	●	●	●	●		●	●
Protection against Advanced Persistent Threats (APT)	●	●					●
Managed service: Classification of 100% of applications before execution (1*)	●	●					●
Managed service: Threat Hunting (2*)	●	●					●
Queries to Panda's cloud-based collective intelligence	●	●	●	●		●	●
Behavioral blocking and IoA detection	●	●	○	○		○	●
Personal and managed firewall	●		●	●		●	●
IDS / HIDS	●		●	●		●	●
Ability to block unknown and unwanted applications	●	●					●
Device control	●		●	●		●	●
URL filtering by category (Web browsing monitoring)	●		●			●	●
Content, Virus and Spam filtering for Exchange Server	●		●			●	●
Built-in antivirus protection for Exchange Server	●		●			●	●
Built-in anti-spam protection for Exchange Server	●		●			●	●
Monitoring							
Advanced endpoint security	●	●					●
Cloud-based continuous monitoring of all process activity	●	●					●
Data retention for one year for retrospective attack investigation	●	●					●
Detection							
Detection of compromised trusted applications	●	●					●
Managed service: Classification of 100% of applications during and after execution (1*)	●	●					●
Fully configurable and instant security risk alerts	●	●	●	●		●	●
Containment							
Real-time computer isolation from the cloud console	●	●					●
Response and remediation							
Ability to roll back and remediate the actions committed by attackers	●	●	●	●		●	●
Centralized quarantine	●	●	●	●		●	●
Automatic analysis and disinfection	●	●	●	●		●	●
Investigation							
Managed service: Threat Hunting (2*)	●	●					●
Incident graphs and lifecycle information available from the Web console	●	●					●
Ability to export lifecycle information for local analysis	●	●					●
Advanced Visualization Tool (add-on)	●	●					●
Discovery and monitoring of unstructured personal data across endpoints (add-on)	●	●					●
Attack surface reduction							
Information about each computer's hardware and software components	●	●	●	●		●	●
Information about the Microsoft updates installed on endpoints	●	●	●	●		●	●
Real-time information about the status of all protections and communications	●	●	●	●		●	●
Unattended, automatic updates	●	●	●	●		●	●
Automatic discovery of unprotected endpoints	●	●	●	●		●	●
Ability to immediately protect unprotected endpoints remotely	●	●	●	●		●	●
Panda native proxy to support endpoints with no Internet connection	●	●	●	●		●	●

○ Functionality extended in other Panda endpoint solutions.

🔵 Full functionality.

○ Functionality extended in other Panda endpoint solutions. Only in Aether-based solutions.

⚫ Full functionality. Only in Aether-based solutions.

* Panda Fusion is a bundle of Panda Endpoint Protection Plus and Panda Systems Management. Panda Fusion 360 is the combination of Panda Systems Management and Panda Adaptive Defense 360 that are sold separately

** Compatible systems with the following types of virtual machines: VMWare Desktop, VMware Server, VMware ESX, VMware ESXi, Citrix XenDesktop, XenApp, XenServer, MS Virtual Desktop y MS Virtual Servers. Panda Adaptive Defense 360 & Panda Fusion 360 solutions are compatible with Citrix Virtual Apps, Citrix Desktops 1906 & Citrix Workspace App for Windows, Panda Securtity has been verified as **Citrix Ready** partner.

1* 100% Classification Service.

2* Threat Hunting and Investigation Service.

AWARDS AND CERTIFICATIONS

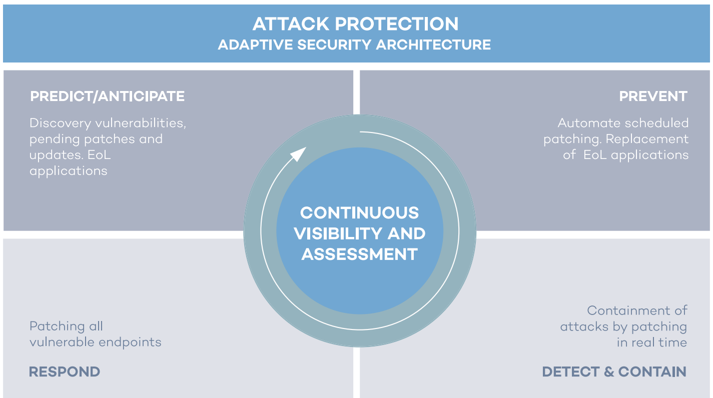
Panda Security regularly participates in and receives awards for protection and performance from Virus Bulletin, AV-Comparatives, AV-Test, NSSLabs Panda Adaptive Defense achieved the EAL2+ certification in its evaluation for the Common Criteria standard.

Optional modules for Panda Adaptive Defense 360 and Panda Adaptive Defense

Panda Patch Management

Panda Patch Management is a module for managing vulnerabilities of the operating systems and third-party applications on Windows workstations and servers.

It does not require the deployment of any new endpoint agents or management console as it is fully integrated in all of Panda Security's endpoint solutions. Plus, it provides centralized, real-time visibility into the security status of software vulnerabilities, missing patches, updates and unsupported (EOL3) software. As well as easy-to-use and real-time to install and monitor updates.



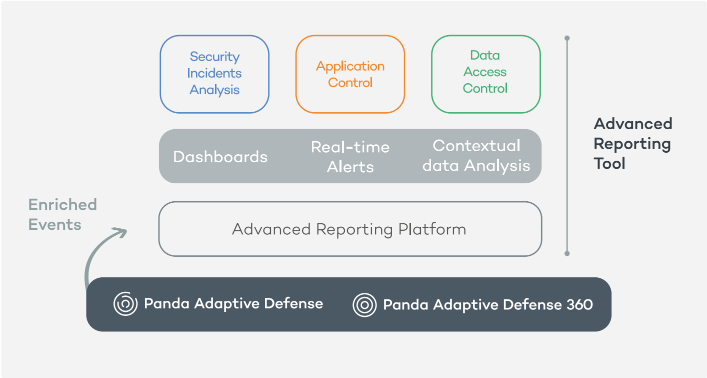
ATTACK PROTECTION
ADAPTIVE SECURITY ARCHITECTURE
PREDICT/ANTICIPATE
Discovery vulnerabilities, pending patches and updates. EoL applications
PREVENT
Automate scheduled patching. Replacement of EoL applications
CONTINUOUS VISIBILITY AND ASSESSMENT
Patching all vulnerable endpoints
RESPOND
Containment of attacks by patching in real time
DETECT & CONTAIN

More information

Supported platforms & Requirements

Advanced Reporting Tool

Advanced Reporting Tool stores and correlates of the information related to process execution and its context extracted by Adaptive Defense from endpoints. Automatically generates security intelligence and provides tools that allow organizations to pinpoint attacks and unusual behaviors, detecting internal misuse of the corporate systems and network and go deeper in a security investigation.

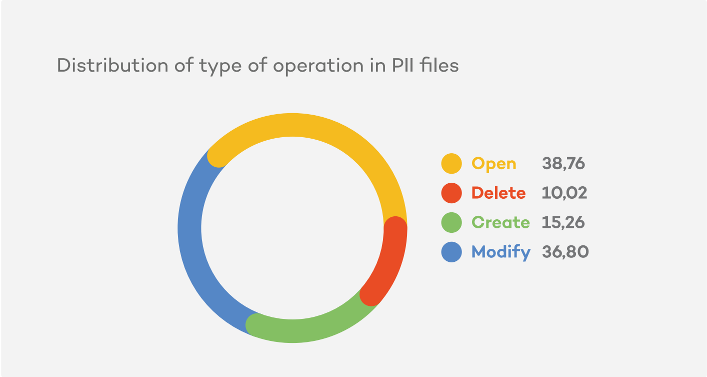


More information

Supported platforms & Requirements

Panda Data Control

Panda Data Control is an unstructured data security module, designed to assist organizations in complying with data protection regulations, as well as discovering and protecting personal and sensitive data both in real time and throughout its lifecycle on endpoints and servers. Panda Data Control discovers, audits and monitors unstructured personal data on endpoints: from data at rest to data in use and data in motion.



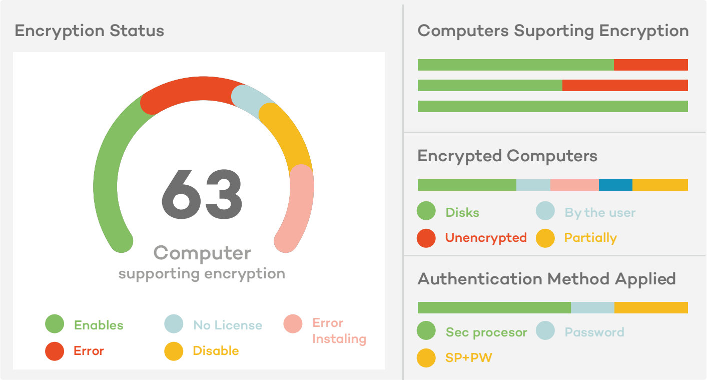
*__Panda Data Control__ is available in the following countries: Spain, Germany, UK, Sweden, France, Italy, Portugal, Holland, Finland, Denmark, Switzerland, Norway, Austria, Belgium, Hungary and Ireland.

More information

Supported platforms & Requirements

Panda Full Encryption

Panda Full Encryption, is an additional module for Panda Security's endpoint protection and advanced adaptive security solutions, designed to centrally manage full disk encryption and provide the following features: Full drive encryption and decryption, Centralized management and recovery of encryption keys, Lists and reports and Centralized policy application.

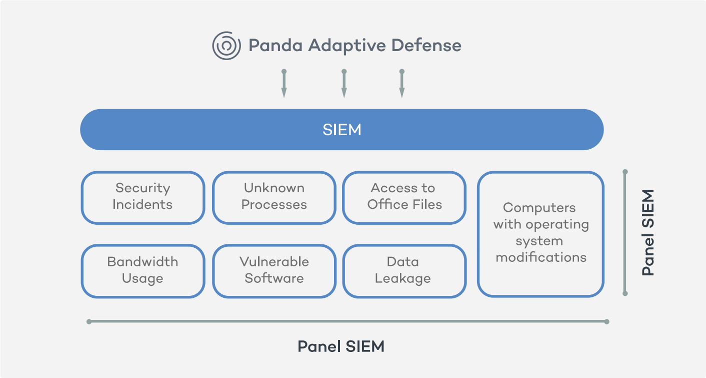


More information

Supported platforms & Requirements

SIEM Feeder

SIEMFeeder. Panda Adaptive Defense and Panda Adaptive Defense 360 seamlessly integrate events gathered from protected endpoints with existing corporate SIEM solutions without additional deployments on users' devices. Monitored events are sent securely using the LEEF/CEF formats compatible with most SIEM systems on the market either directly or indirectly via plugins.



More information

Supported platforms & Requirements

EMAIL PROTECTION

Panda Email Protection

Panda Email Protection filters out spam and threat from the inbound and outbound email traffic, through online scans performed on Panda Security's servers. Email Protection requires no client infrastructure. All operations are performed in the cloud.

Key Benefits:

- Ensures the highest levels of detection for known and unknown
- Is a cloud-based service, it requires no infrastructure investment or specialized staff
- Security can be managed anytime, anywhere from the Web console
- It gives users secure, uninterrupted access to email via webmail
